

Xerox® Automated Packaging Solution  
for the iGen4® and iGen® 150 Presses  
The only integrated, inline  
digital solution for packaging.

# Better solutions for your customers, an expanded product line for you.

**Offer more options and get products to market faster with an integrated short-run solution.** The Xerox® Automated Packaging Solution seamlessly joins four components into one powerful system for folding carton manufacturing. Designed to make short runs effective and affordable, it expands your opportunities for producing targeted, specialised packaging that better meets your customers' needs.

## Take advantage of new product opportunities.

With a print-on-demand system, you can satisfy the growing trend for short-run packaging quantities and expanded versioning. Accommodate your customers' needs for multiple languages, regional preferences or targeted marketing by changing colours, text and images on the fly. Enable item-level product identification for tracking and tracing, as well as advanced anti-counterfeiting measures. With the system's variable information capability, you can quickly and affordably produce packaging with a high degree of customisation and personalisation.

## Reduce time to market.

Whether the need is short runs for test marketing and private-label brands, or multiple versions for regional preferences and time-sensitive promotions, you'll be able to efficiently produce packaging with this print-on-demand workflow. You'll reduce your turnaround time, while helping your customers get their products to market faster.

## Improve efficiency and integrity working inline.

Streamline your folding carton manufacturing with one inline system that does it all – printing, coating, stacking and die cutting. With the inline configuration, you have full system integrity for secure applications. Plus, it can be combined with your existing workflow so you can leverage your current investments.

## The Xerox® Automated Packaging Solution

integrates the latest in digital printing technology with a versatile coating unit, an innovative buffering stacker and a custom die cutter. With its modular architecture, the system is scalable to your needs.

### Enhance your capacity and productivity.

The Xerox® Automated Packaging Solution for iGen® presses complements your current packaging operation. Move short runs to this digital production line and you'll free up capacity on your other equipment for longer runs. Designed for quick changeovers, it accommodates last-minute needs and changes with ease.

### Achieve greater profits with shorter runs.

By adding this high-quality, short-run folding carton solution to your production workflow, you become an indispensable, one-stop resource with the ability to offer both long-run offset and short-run digital. When you can say "yes" to every packaging job, you actually increase your already profitable offset business. It's a win-win situation that yields greater opportunities, productivity and profits.

### What can an on-demand production solution give you?

- Accelerated time to market
- Faster changeover between jobs
- Less inventory and waste
- Variable information options
- Anti-counterfeiting measures
- Cost effective short runs
- Expanded revenue generating capabilities

# Xerox® Automated Packaging Solution

## Xerox® iGen4® and iGen® 150 Presses

Count on these revolutionary digital presses for short-run colour that's fast, effective and affordable. Deliver high-quality printing and a wide range of applications.

- Print speeds of up to 110 ppm (iGen4), and 150 ppm (iGen 150)
- Exceptional colour image quality
- Pantone® certified
- Prints on typical packaging boards and papers
- Driven by the high performance Xerox® FreeFlow® Print Server
- Enables customisation with the Xerox® FreeFlow Variable Information Suite

## TRESU® Pinta Coater

- Optimised for digital printing with modular structure
- Option for both aqueous and UV coating
- Optional image inspection system for print integrity
- Inline or standalone
- 364 mm x 660 mm
- Sample/Rejection box module

## KAMA DC 76 Die Cutter

- Flat-bed die cutter
- Speed 5000 sheet/hr
- Maximum sheet size 600 mm x 760 mm
- Braille and embossing
- Optional hot foiling/hologram unit
- Optional 2-second sheet scanner

## Epic® CTi-635 Inline Coater

With this easy-to-use inline coater, you can have the versatility of applying a gloss or matt finish. Prints emerge dry and ready for finishing.

- CoatTech Anilox coating technology
- Aqueous or UV approved coatings
- Precision Anilox roller and blade
- Digital sheet controls
- Bypass mode

## KAMA Buffering Stacker Line

Continue printing even when the die cutter is offline with this unique buffering stacker. It efficiently separates jobs using multiple queues for enhanced productivity.

- Stacks up to 600 mm high
- Precise sheet alignment function
- Inline and offline operation
- Clearly structured user interface
- Industrial grade construction
- Seamless integration with the KAMA DC 58

## KAMA DC 58 Die Cutter

Specifically built for the Xerox® Automated Packaging Solution, the accessible design of this compact die cutter makes it quick and easy to change tooling.

- Simple and compact die cutting
- Precise sheet transport with sheet feeder arranged at a right angle
- Two suction nozzles
- Gripper bar system
- Accessible locking frames and cutting plates
- Constructed on a single monobloc with integrated vibration absorbers
